

GIMP Course

Due to popular demand, I will be running a GIMP course in June 2019.

GIMP is the free, open source competitor to Photoshop.

It is powerful, easy to use, extensible and visually stunning!

If you want to learn to do graphics as well as manipulate your images, please think of joining this day long introductory course.

The syllabus will cover:

- Basics of layers
- Layer blend modes
- Basic tools such as brush, airbrush, crop, etc.
 - Selection modes
- Non-destructive editing
- The powerful pen tool
- Exporting images
- Dodging and burning.

Feel free to contact me at paul@logwiz.co.za for more info. (Max 6 allowed)
