

Wordpress Course

Due to popular demand, I will be running a Wordpress course in June 2019.

Wordpress (WP) powers 30% of all websites on the internet;
and there is good reason for it.

It is powerful, easy to use, extensible and visually stunning!

If you want to learn to design and maintain your own website, please think of joining this day long introductory course.

The syllabus will cover:

- The WP dashboard;
- How to create pages;
- How to create blog posts;
- Themes, and designing in them;
 - Widgets;
 - Menus; and
- Basic web design protocols.

Feel free to contact me at paul@logwiz.co.za for more info. (Max 6 allowed)
